

Latin Comparative Pathology Group

The Latin Subdivision of the CL Davis Foundation

Diagnostic Exercise

Case #: 18 Month: February Year: 2012

*** Submissions must be in English. Additional Spanish and/or Portuguese translation is also welcome ***

Contributor: Ingeborg M. Langohr, DVM, PhD, DACVP, Diagnostic Center for Population and Animal Health, Michigan State University, East Lansing, MI, USA

Clinical History: An 11-year-old, male neutered Maltese had a growing uveal mass of approximately 1-month duration. Enucleation of the affected eye was recommended.

Gross Findings: Please see the images below.

Follow-up questions:

1. Description
2. Morphologic diagnosis
3. Immunohistochemical findings

Please send your comments/questions to the whole LCPG list by hitting "reply to all".

A final document containing this material with answers and a brief discussion will be posted on the C. L. Davis website by the end of the current month (http://www.cldavis.org/lcpg_english.html).
